

# PORTABLE FIRE EXTINGUISHERS

## SEE IT

**Know** where the closest fire extinguisher is located.

**Familiarize** yourself with the location of fire extinguishers in your building so you can find one quickly in the event of a fire.

**Trained** fire extinguisher professionals have selected and installed the proper extinguisher for your location.

## GRAB IT

Trained technicians have strategically placed extinguishers throughout your building. They also service the extinguishers on a regular basis so you can be assured the right extinguisher is readily available and will work during a fire emergency.

## USE IT

When it's time to use a fire extinguisher, just remember **P.A.S.S.**

**Pull** the pin.

**Aim** the nozzle or hose at the base of the fire from a safe distance.

**Squeeze** the operating lever to discharge fire extinguishing agent.

**Sweep** the nozzle or hose from side to side until the fire is out, from a safe distance. Move forward or around the fire area as the fire diminishes. Watch the area in case of re-ignition.

For more information on how to use a fire extinguisher with the P.A.S.S. method, visit [FireExtinguishersSaveLives.org](http://FireExtinguishersSaveLives.org).
